## Fhiaba range presentation

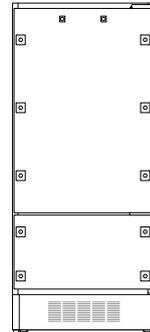

### S

For those who prefer a coordinated interior design that showcases a stylish, individual and unique environment, Fhiaba developed the Integrated series.

All models are equipped with unique technical solutions which allow for complete integration of the product while maintaining the Fhiaba characteristics of space, functionality and superior design.

Available in width 90 cm (35 1/2"), 75 cm (29 5/8") and 60 cm (23 3/4") and depth 61 cm (24" in), always with compressors located at the bottom.

The range is available in a refrigerator and wine cellar.

### K

Fhiaba's innovative solutions have been transformed into a smooth, sleek design featuring fresh aesthetics and tubular stainless steel handles a satin finish.

This design represents the ideal solution to complete your kitchen design with a professional refrigeration and wine ageing system.

Available in width 90 cm (35 1/2"), 75 cm (29 5/8") and 60 cm (23 3/4") and depth 63,5 cm (25" in), always with compressors located at the bottom.

The range is available in a refrigerator and wine cellar.

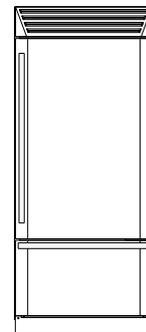

### M

Fhiaba's signature design. Standplus models match iconic and contemporary style and the characteristics usually found in professional appliances (products with top mount compressors and top ventilation grille) with the unmistakable design of Italian-made products.

These models are the pinnacle of the range offered by Fhiaba, and are the optimal solution to include an advance food and beverage preservation system in refined and elegant interiors.

Available in width 90 cm (35 1/2"), 75 cm (29 5/8") and 60 cm (23 3/4") and depth 63,5 cm (25" in), always with compressors located on the top.

The range is available in a refrigerator and wine cellar.

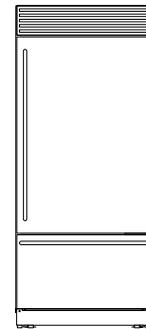

### X

The latest addition to the Fhiaba range, X-Pro models can transform any interior into a state-of-the-art professional kitchen, worthy of professional chefs. The X-Pro design, featuring a heavy-duty top ventilation grille and strong tubular stainless steel handles, has been developed to satisfy requests for a professional-looking kitchen at home, which reflects the highly technological features of the refrigeration system within each Fhiaba.

Available in width 90 cm (35 1/2"), 75 cm (29 5/8") and 60 cm (23 3/4") and depth 63,5 cm (25" in), always with compressors located on the top.

The range is available in a refrigerator and wine cellar.

**All the Fhiaba range can be ordered with stainless steel sides for free standing installation**

## Product code

Example:

KS 899 OT ST 6 i

KS

### digit # 1-> model series

KS = Classic (bottom compressors, stainless steel front)  
 MS = StandPlus (top compressors, stainless steel front)  
 XS = X-Pro (top compressors, stainless steel front)  
 S = Integrated (bottom compressors, flush or built-in)  
 BI = Brilliance (bottom compressors, flush or built-in)  
 BKI = Brilliance - Classic (bottom compressors, stainless steel front)

899

### digit # 2-> width

899 = 90 cm (35 1/2" in)  
 749 = 75 cm (29 5/8" in)  
 599 = 60 cm (23 3/4" in)

OT

### digit # 3-> model configuration

1T = one bottom drawer with Fresco/Riserva  
 OT = one bottom drawer with Low Temp drawers / Dual zone wine cellar  
 0H = Two bottom-drawers, two separate temperatures  
 0F = column model with 1 temperature

ST

### digit # 4-> function and door style

ST = Fridge/Trimode, Solid door  
 GT = Fridge/Trimode, Glass door  
 WT = Wine Cellar/Trimode  
 R = Fridge column  
 Z = Freezer column  
 W = Wine Cellar column

6

### digit # 5 > hinge positioning

3 = hinge on the left  
 6 = hinge on the right

i

### digit # 6 > model options

To indicate a unit equipped with Ice Maker  
 (not available on models 599) -> add "i"

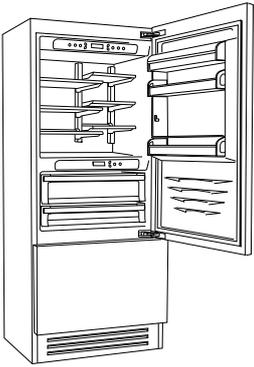

# Presentation standard models

## Distinctive features

### *Energy Efficiency*

**Energy efficiency class A+.** This is the common grading of all Fhiaba preservation systems, a guarantee of high energy savings and compliant with environmental standards.

### *TriPro Refrigeration*

Maximum **freshness is guaranteed** when each food product is preserved at the correct temperature. This is the philosophy behind Fhiaba triple refrigeration system that ensures optimum preservation conditions thanks to the efficient separation of the internal **Fridge, Fresco and Freezer** compartments. Two state-of-the-art compressors and three evaporators ensure continuous operation, energy saving and maximum silence.

### *TriMode Bottom - Drawers*

Fridge, Fresco or Freezer: simply select the desired mode through Fhiaba Access menu to modify the operating mode of the Bottom-Drawers. A versatile function that makes it **extremely flexible** to manage the preservation environments, particularly when more units are installed.

### *NoFrost*

Fhiaba NoFrost is a 100% automatic system that eliminates the need for Fridge, Fresco and Freezer defrosting. It also allows a **quicker return to normal operating temperature** every time the door is opened thanks to its significant refrigerating speed.

### *ProVent*

ProVent Fhiaba ventilation system guarantees a uniform distribution of cold air in all the fridge compartments by laterally circulating the air. It is therefore possible to maintain a **uniform temperature** throughout allowing better food preservation conditions.

### *LowTemp (0T)*

Two drawers compartment with low temperature and high humidity, hermetically closed on all sides to contain foods preventing any leakage. This section allow to store fresh food at a temperature maintained closed to 0°C.

### *DualZone (0T/0H)*

This function, available in all 0T/0H Wine cellars, creates a stratification of temperatures that allow the user to store red wines in the upper shelves and white wines in the lower shelves of the Wine cellar. The temperature difference between the top and the bottom of the Wine section is around 4/5 °C.

### *Fresco (1T)*

Compartment with **controlled temperature and humidity** with two spacious drawers entirely in stainless steel, hermetically closed on all sides to contain foods preventing any leakage. The internal rounded edges and the possibility of completely removing the drawers, thanks to the special telescopic slides, allow for easy cleaning operations. The Fresco compartment prevents the dispersion of cold air, the diffusion of odour and the cross-contamination foods, guaranteeing a high quality preservation for gourmet foods, delicacies and fresh produce.

### *Riserva (1T)*

Models with Wine Cellar are fitted with Riserva, a compartment with temperature and humidity levels controlled independently from the upper zone. Riserva compartment exclusively dedicated to the optimum **preservation of fine aging wines.**

### *Equilance*

Dual-movement hinge combining technological innovation and design. It is protected by international patent like all Fhiaba original solutions. The **self-balancing movement** guarantees stability and resistance to infinite openings and above all allows for integrated, flush installation of all of Fhiaba's models.

### *Fhiaba Access*

The new electronic technology that manages and monitors the entire refrigerator operation process is user-friendly and intuitive. The digital displays show the actual temperature of the Fridge and Fresco compartments and the Bottom-Drawer as well as the date and time, thanks to the RealTime Clock system. Fhiaba Access interactive menu allows the user to easily select the numerous available functions and **customise the operation** of the refrigerator according to personal needs.

**Actual Temperatures  
Independent Compartments  
Information Messages  
Multilingual  
Date & Time  
Ice Cubes Dimensions  
SuperIce™  
BottleCooler  
Shopping  
Vacation**

### *Lighting*

The OptiView lighting system uses modern LED technology to ensure an optimal view of the interiors. Two LED arrays light the refrigerator compartment from above, while individual spot lights illuminate directly distinct areas of the fridge compartment, Fresco and TriMode drawers.

### *Finishes*

Satin stainless steel exteriors and antibacterial micro-brushed **stainless steel** interiors with high quality aluminium finishes and ultra bright tempered glass shelves.

Linear compartments with evaporators fully integrated in the side panel of the appliance and rounded angles for easy cleaning and better hygiene.

### *Ice Maker*

Makes **ice cubes automatically** in the required size, Medium or Large, with water purified through the integrated filtering system.

Once made, the ice cubes are dropped in the ice drawer, located in the TriMode Bottom-Drawer.

In order to guarantee a vibration-free environment for fine wines, the Ice Maker is not available in Wine Cellars.

### *EvenLift shelves*

Sliding shelves on Fhiaba patented mechanism can be **adjustable at any height** in the fridge compartment without removal.

The interior becomes versatile, allows for easy and quick storing containers of varying height (bottles, cartons etc.) and a variety of oddly shaped foods.

### *Integrated Water Filter*

The integrated water filter system guarantees bacteriafree water also thanks to the clever positioning of the filter cartridge inside the fridge compartment at low temperature. If ice consumption slows down, an automatic cleaning cycle will eliminate water stagnation in the system thus ensuring the highest quality of ice.

### *Soft closing systems*

State-of-the-art devices ensure silent and soft closing of doors and drawers, every time and with the slightest touch.

### *Anti-Vibration*

Full protection from vibration thanks effective compressor insulation and by soft closing systems on each and every wooden shelf to protect bottles from shocks.

### *Wine shelves*

Wine Cellar models are equipped with shelves for optimum wine preservation. Made of natural wood they are fully-extractable and can accommodate bottles of different sizes.

Both compartments offer an extra advantage: by removing one shelf, another can be inclined, a practical solution for opened bottles and an elegant system to **display the finest wines**.

### *Glass doors*

All glass doors are made of **multi-layered glass** with anti-breakage double pane.

An unusual choice for the Fridge models that not only conveys a modern and original touch but is also environmentally friendly giving visibility to the internal compartment without the need to open it and stress the refrigeration system.

Wine Cellar models are equipped with tinted glass to protect wine from the harmful effects of light.

### *Humidity Control*

Through FhiabaAccess menu it is possible to select the desired humidity level, low, high or medium, to ensure the correct preservation of corks, key element to the correct preservation of every fine bottle.

### *Three layers of protection*

Fhiaba Wine Cellars are the only ones featuring a glass door with 3-panes of bronzed glass to guarantee maximum protection from UV rays & sudden temperature changes of the external environment.

### *Actual Temperatures*

Several sensors inside the compartments monitor the actual temperatures of each area, in real time on the digital display. In case of a power failure, the highest temperatures will be registered and displayed to allow for disposal of foods which might have deteriorated.

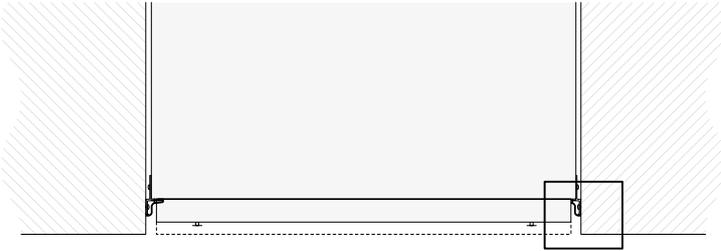

### *Independent Compartments*

Through the touch sensitive panel it is possible to manage each compartment independently: they can be switched on and off and different temperatures can be set for each of them thus allowing for an intelligent energy consumption.

## Space Design Installation types

*Flush installation with standard aluminum trims*

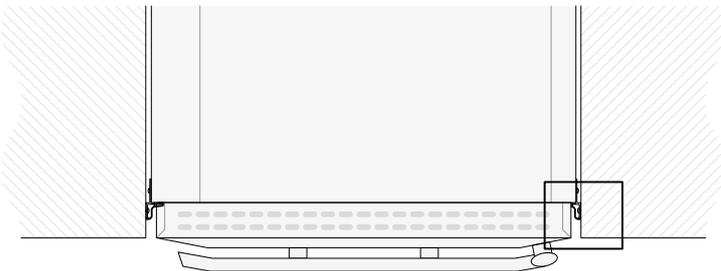

### S Series

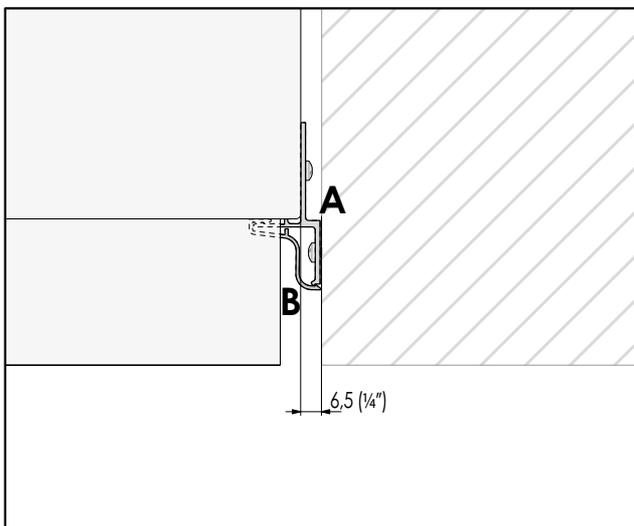

### K Series

### M Series

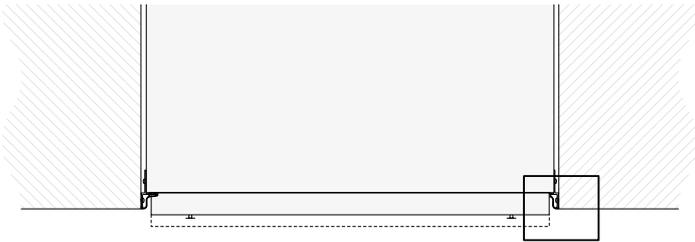

### X Series

The Lateral Connection Kit (KCLIT/KCLIH/KCLMT/KCLMH) is supplied on all models (except in the unit with stainless steel sides) and consists of a connection element (A) and a aluminium frame (B).

*Prominent installation with standard aluminum trims*

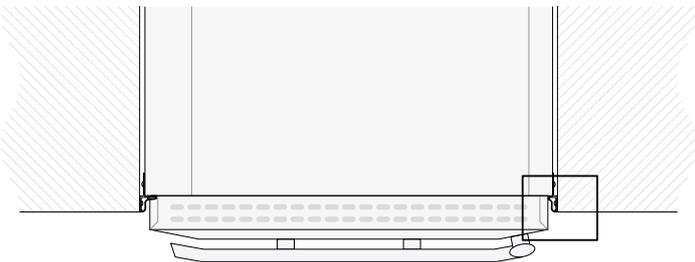

**S Series**

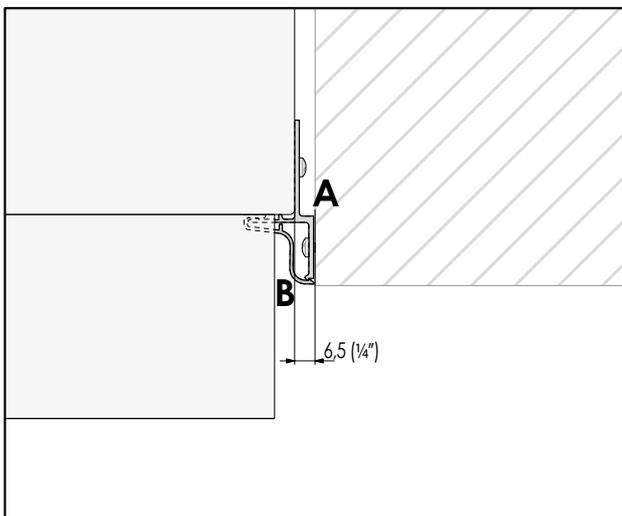

**K Series**

**M Series**

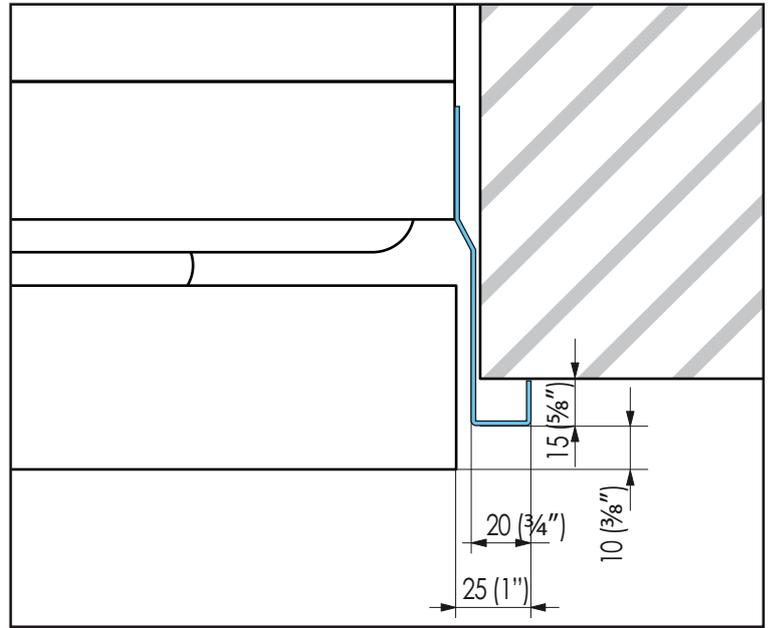

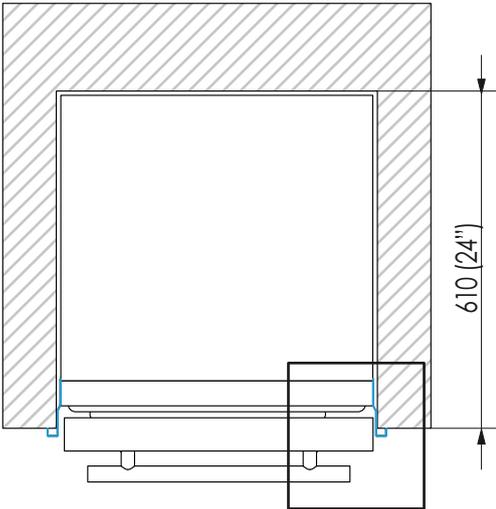

**X Series**

The Lateral Connection Kit (KCLIT/KCLIH/KCLMT/KCLMH) is supplied on all models (except in the unit with stainless steel sides) and consists of a connection element (A) and a aluminium frame (B).

*Built-In kit*

Niche 610 mm (24" in)

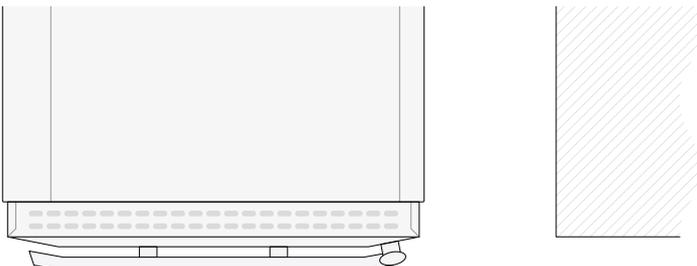

*Free standing installation*

For the free standing installation ordered the stainless steel sides.  
The sides will be pre-installed directly in the factory and are no more removed.

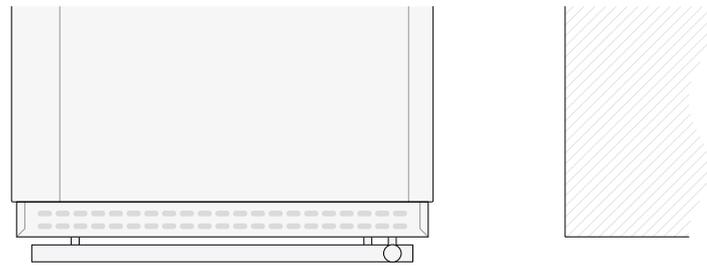

**K Series**

**M Series**

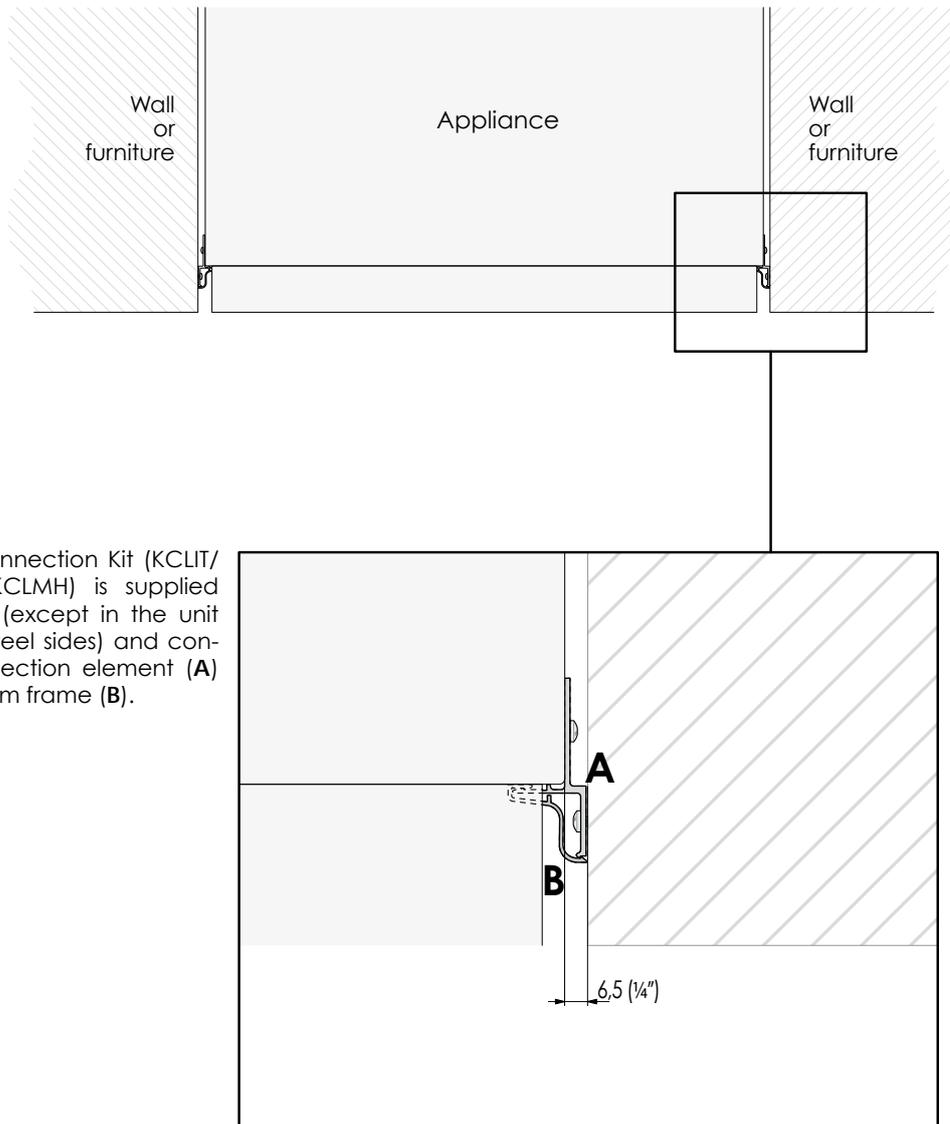

**X Series**

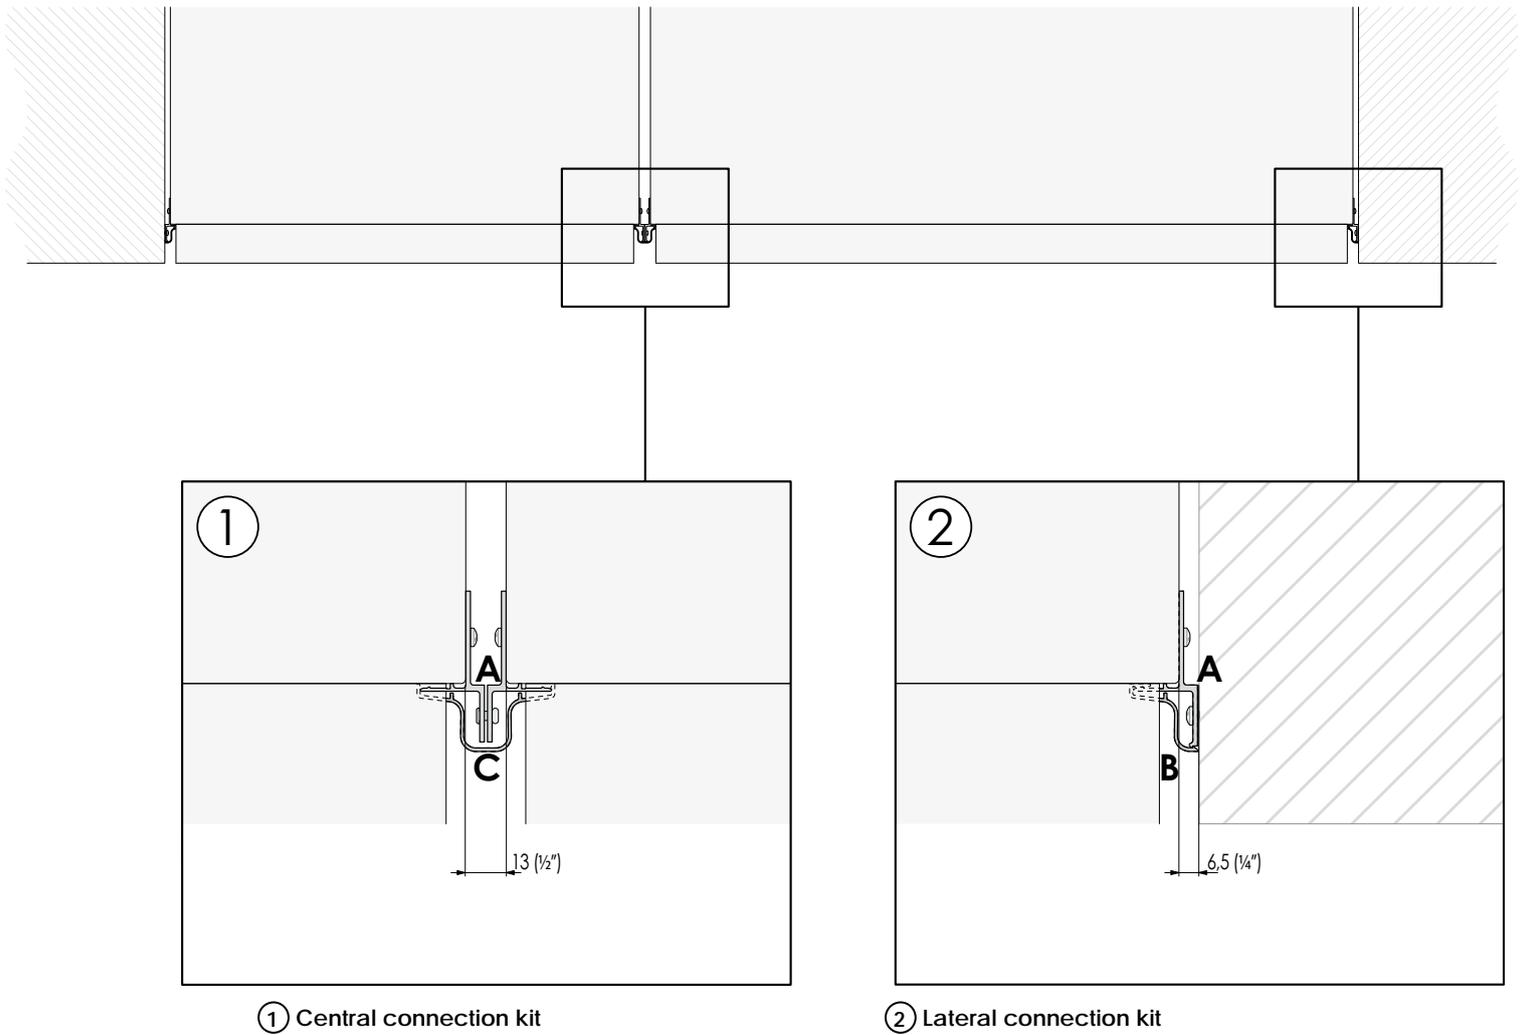

# Typologies of combinations

## *Single installation*

The Lateral Connection Kit (KCLIT/KCLIH/KCLMT/KCLMH) is supplied on all models (except in the unit with stainless steel sides) and consists of a connection element (A) and a aluminium frame (B).

*Installation of two or more appliances*

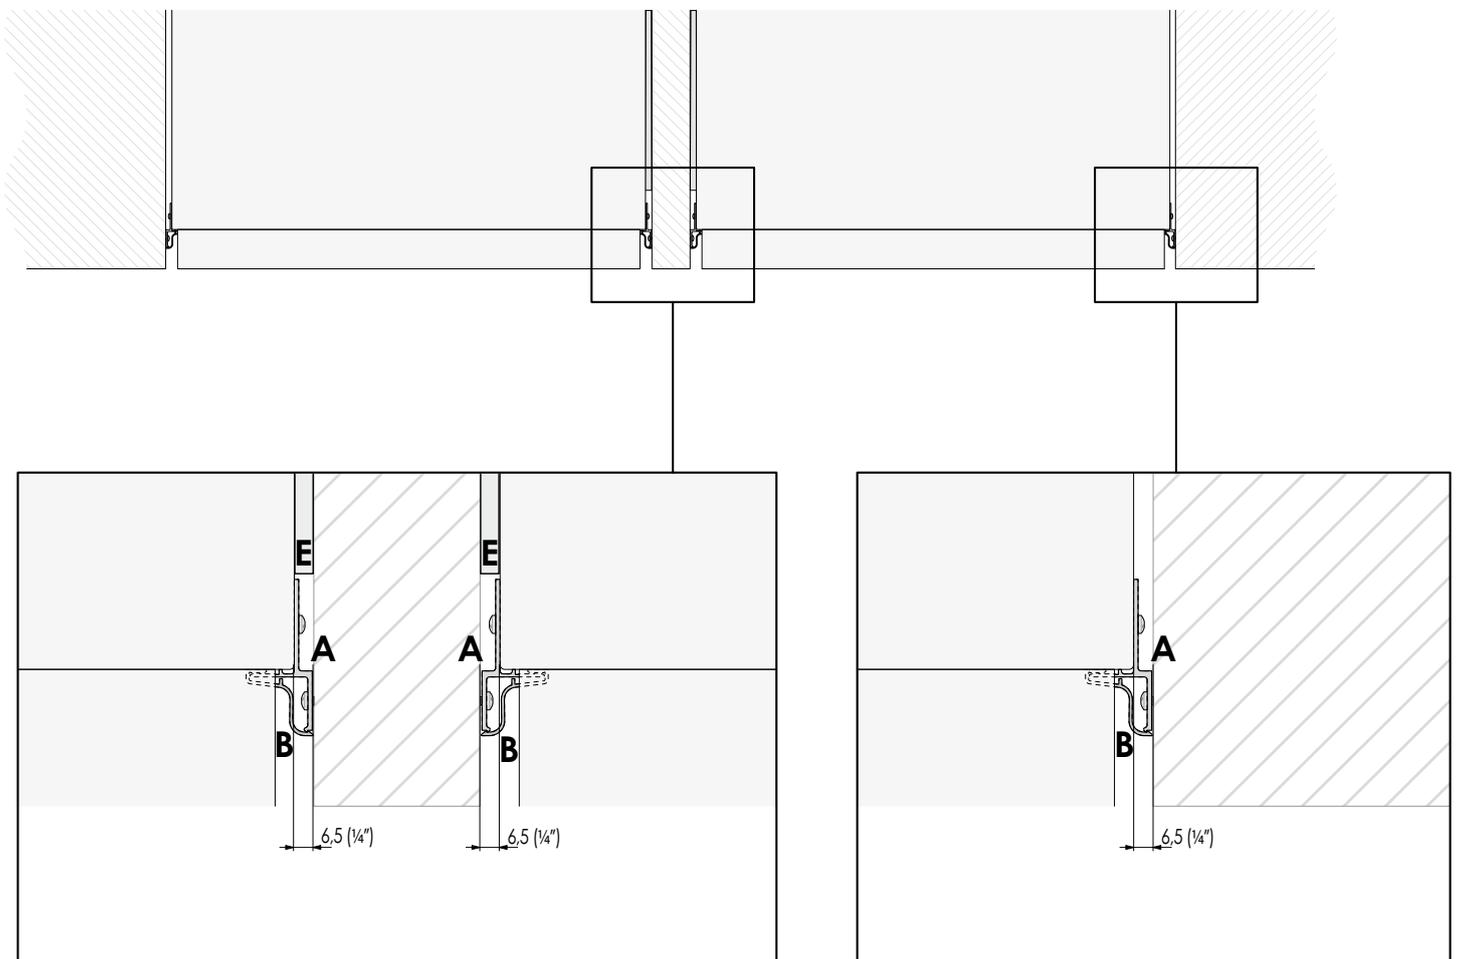

The Central Connection Kit ① (KCCIT/KC-CIH/KCCMT/KCCMH) must be ordered separately, consists of two connection elements (A) and a central aluminium frame (C).

The Lateral Connection Kit ② (KCLIT/KCLIH/KCL-MT/KCLMH) is supplied on all models (except in the unit with stainless steel sides) and consists of a connection element (A) and a aluminium frame (B).

### *Built-in installation appliances separated by wall or panel*

If the design of the kitchen unit provides for the installation of two adjacent appliances, but separated by an in-between panel (or wall or cavity) of a thickness below 16 cm (6 1/4 in), then the installation can be done as it were two single installations. It is required, however, that an anti-

condensation panel (KAC16) is placed on the facing sides of the appliances. If the in-between panel (or wall or cavity) has a thickness higher than 16 cm (6 1/4 in) then this precaution is not required.

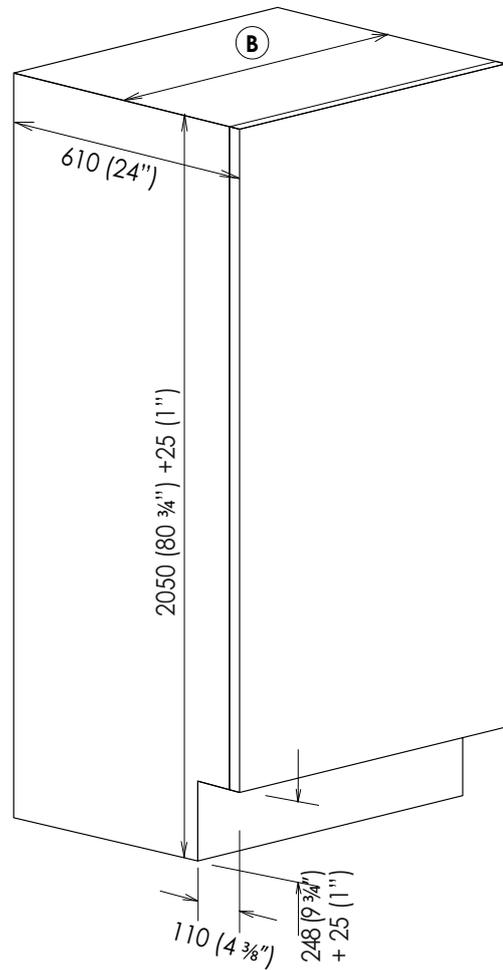

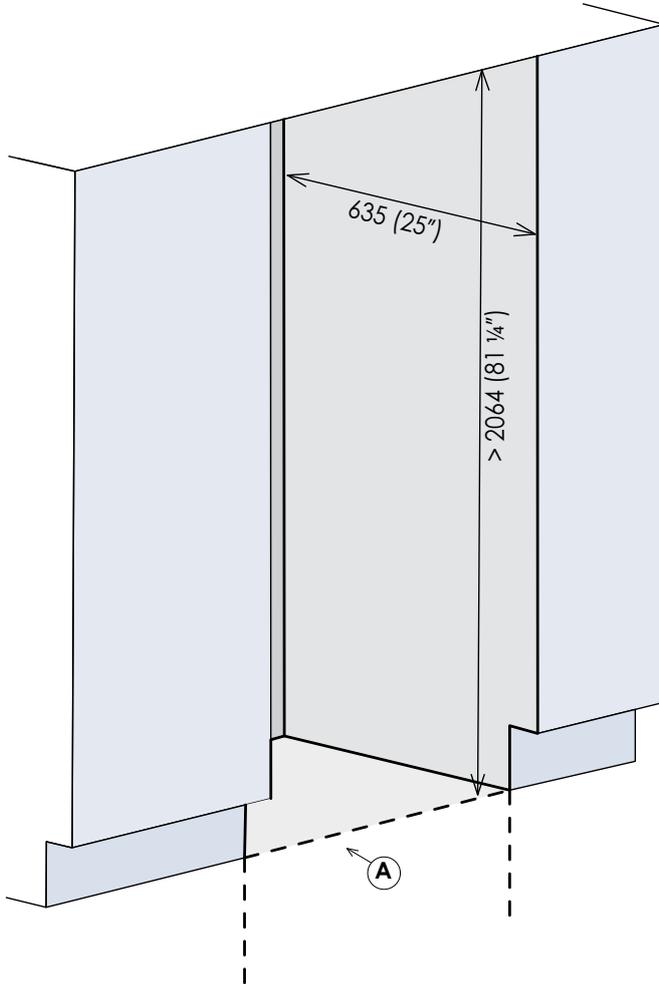

**A** Connecting element  
**B** Aluminium frame  
**E** Anti-condensation panel

**A** Connecting element  
**B** Aluminium frame

# Technical data

## Niche dimensions: Integrated Series

The feet adjustment system allows to increase the height of the apparatus of 25 mm (1") than the height of 2050 mm (80 3/4" in)

|               | 899                 | 749                 | 599                 |
|---------------|---------------------|---------------------|---------------------|
| Niche Width A | 900 mm (35 1/2" in) | 750 mm (29 5/8" in) | 600 mm (23 3/4" in) |
| Unit Width B  | 887 mm (35" in)     | 737 mm (29" in)     | 587 mm (23 1/8" in) |

For installation of two or more units, refer to p. 34

*Installation niche features:  
Integrated Series*

- A** area to be left clear for the anti-tipping brackets
- E** area to be left clear for the power supply cable
- W** and water supply hose

**Minimum Niche Height**

2064 mm (81 1/4")

**Minimum Niche Width**

S899: 900 mm (35 1/2")

S749: 750 mm (29 5/8")

S599: 600 mm (23 3/4")

**Door Swing Clearance**

S899: 1470 mm (57 7/8")

S749: 1320 mm (52")

S599: 1170 mm (46")

**Door Opening Angle**

105°

**Width**

S899: 899 mm (35 3/8")

S749: 749 mm (29 1/2")

S599: 599 mm (23 5/8")

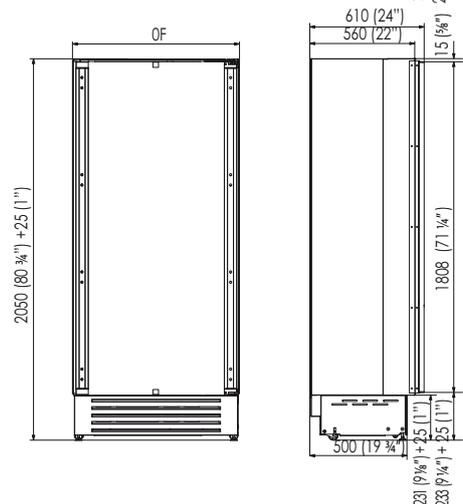

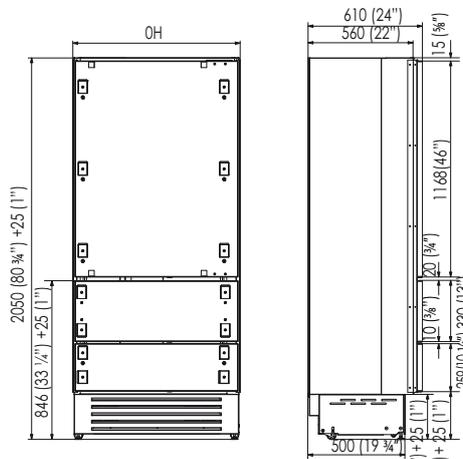

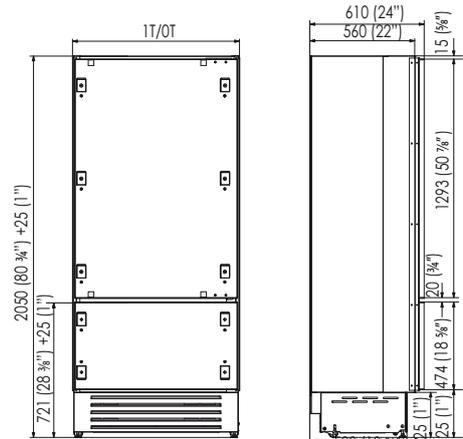

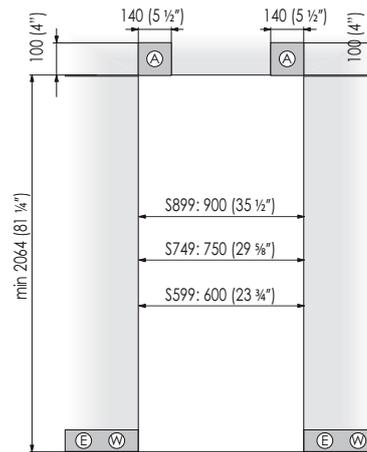

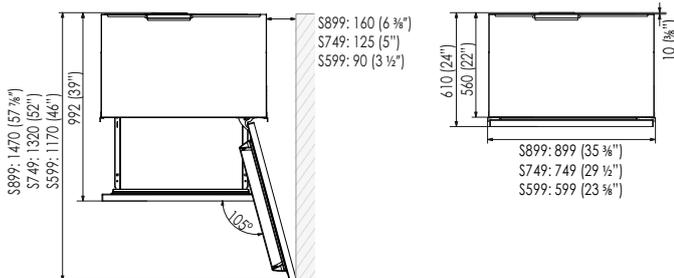

**Height**

2050 mm (80 3/4") + 25 mm (1")

**Depth with door (without panel)**

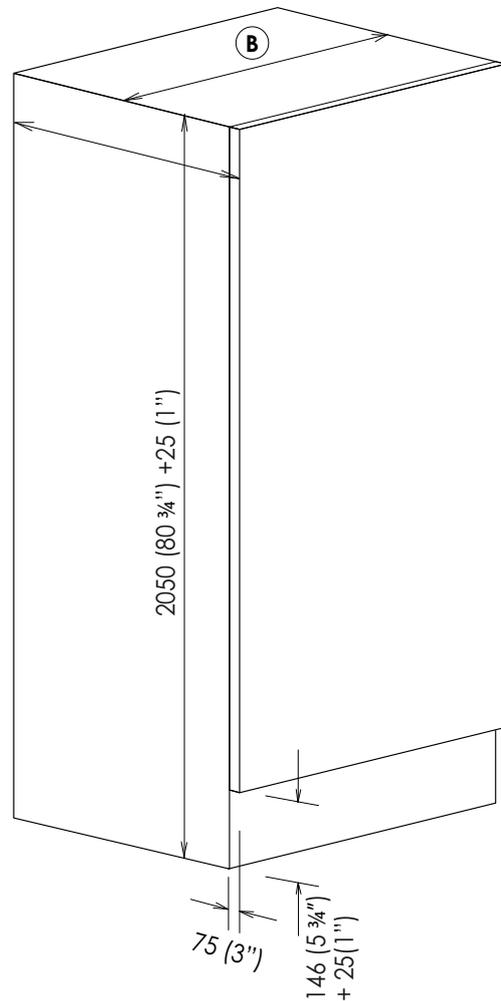

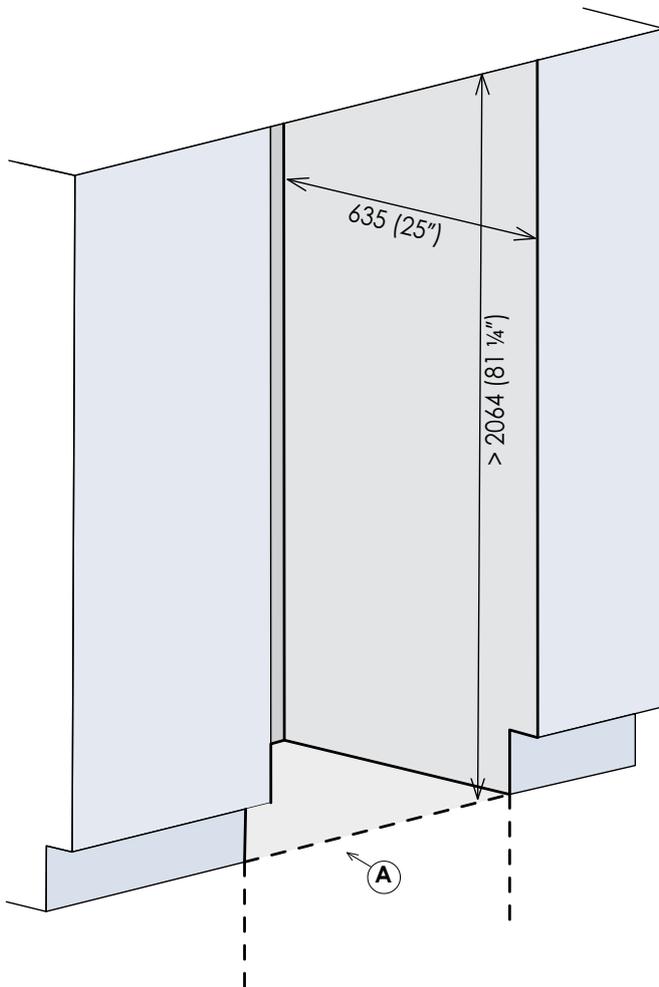

610 mm (24")

**Important:** A 90° door opening is sufficient to allow opening and full extraction of the inner drawers, even if the appliance is installed directly adjacent to a wall. Should an opening at 105° be desired, then the appliance should be positioned at the distance from the wall described in figure.

|---------------|---------------------|---------------------|---------------------|
| Niche Width A | 900 mm (35 1/2" in) | 750 mm (29 5/8" in) | 600 mm (23 3/4" in) |
| Unit Width B  | 887 mm (35" in)     | 737 mm (29" in)     | 587 mm (23 1/8" in) |

For installation of two or more units, refer to p. 34

## Installation niche features: Classic Series

- A** area to be left clear for the anti-tipping brackets
- E** area to be left clear for the power supply cable
- W** and water supply hose

### Minimum Niche Height

2064 mm (81 1/4")

### Minimum Niche Width

KS899: 900 mm (35 1/2")

KS749: 750 mm (29 5/8")

KS599: 600 mm (23 3/4")

### Door Swing Clearance

KS899: 1470 mm (57 7/8")

KS749: 1320 mm (52")

KS599: 1170 mm (46")

### Door Opening Angle

105°

### Width

KS899: 899 mm (35 3/8")

KS749: 749 mm (29 1/2")

KS599: 599 mm (23 5/8")

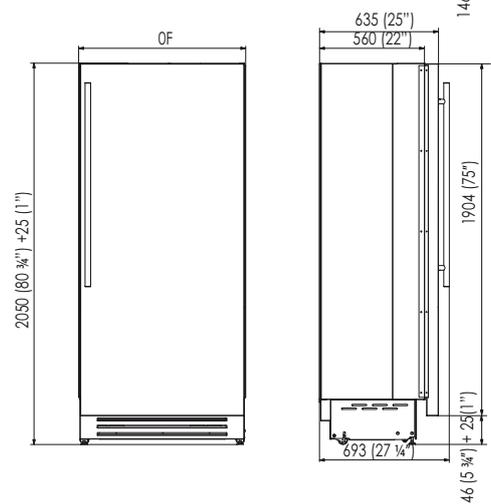

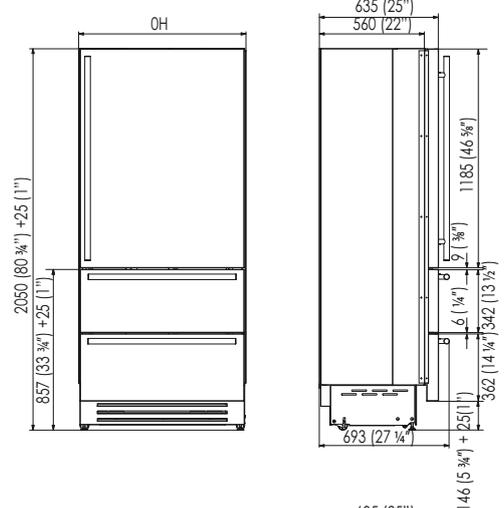

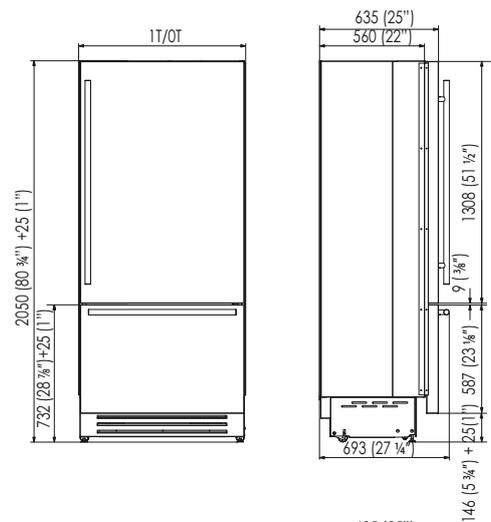

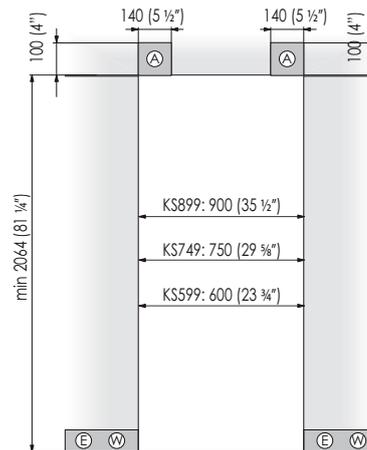

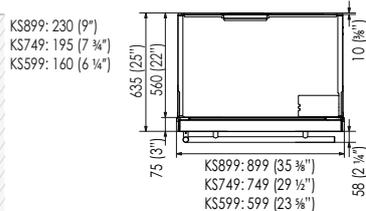

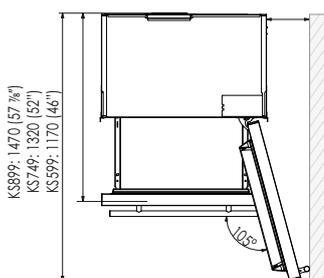

### Height

2050 mm (80 3/4") + 25 mm (1")

### Depth with door (without panel)

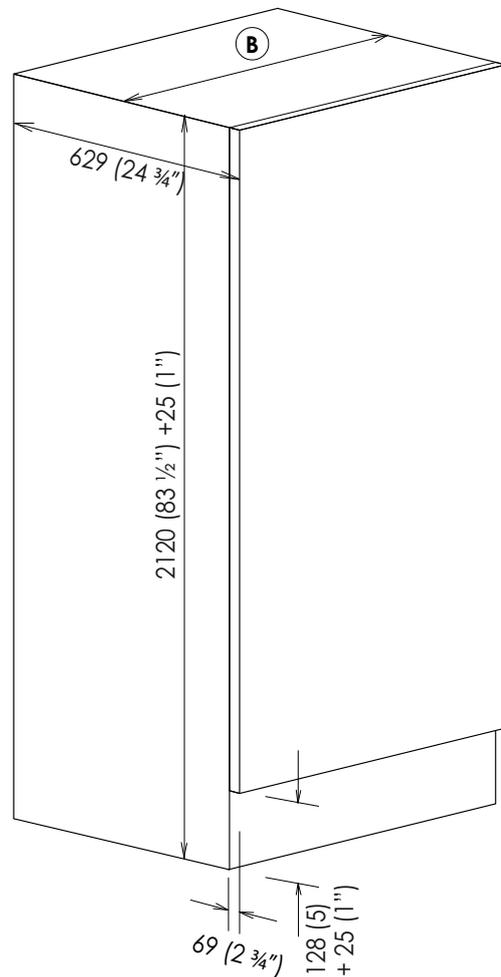

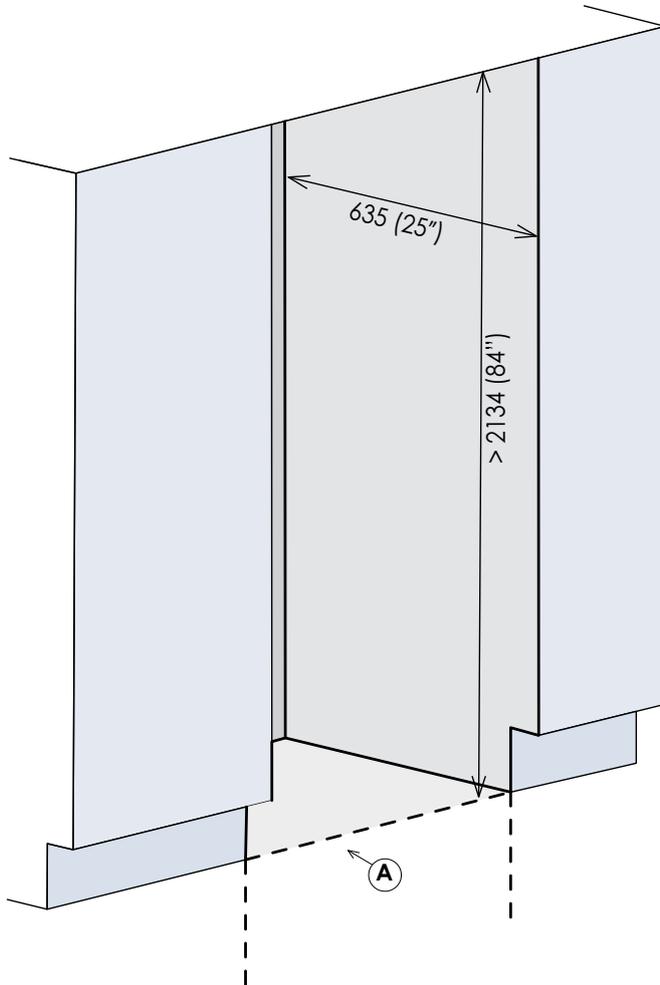

635 mm (25")

**Important:** A 90° door opening is sufficient to allow opening and full extraction of the inner drawers, even if the appliance is installed directly adjacent to a wall. Should an opening at 105° be desired, then the appliance should be positioned at the distance from the wall described in figure.

# Technical data

Niche dimensions: *StandPlus Series*

The feet adjustment system allows to increase the height of the apparatus of 25 mm (1") than the height of 2120 mm (83 7/8" in)

|                      | 899                 | 749                 | 599                 |
|----------------------|---------------------|---------------------|---------------------|
| Niche Width <b>A</b> | 900 mm (35 1/2" in) | 750 mm (29 5/8" in) | 600 mm (23 3/4" in) |

Should an opening at 105° be desired, then the appliance should be positioned at the distance from the wall described in figure.

## Installation Niche Width for Combinations

In order to calculate the total niche dimension for installation of two or more appliances, the following elements are to be considered:

- Lateral connecting kit (6,5 mm/0,2 in)
- Central connecting kit (13 mm/0,5 in)
- Lateral connecting kit (6,5 mm/0,2 in)

The joining kit is positioned between two units to secure them together.

The following table gives a few examples:

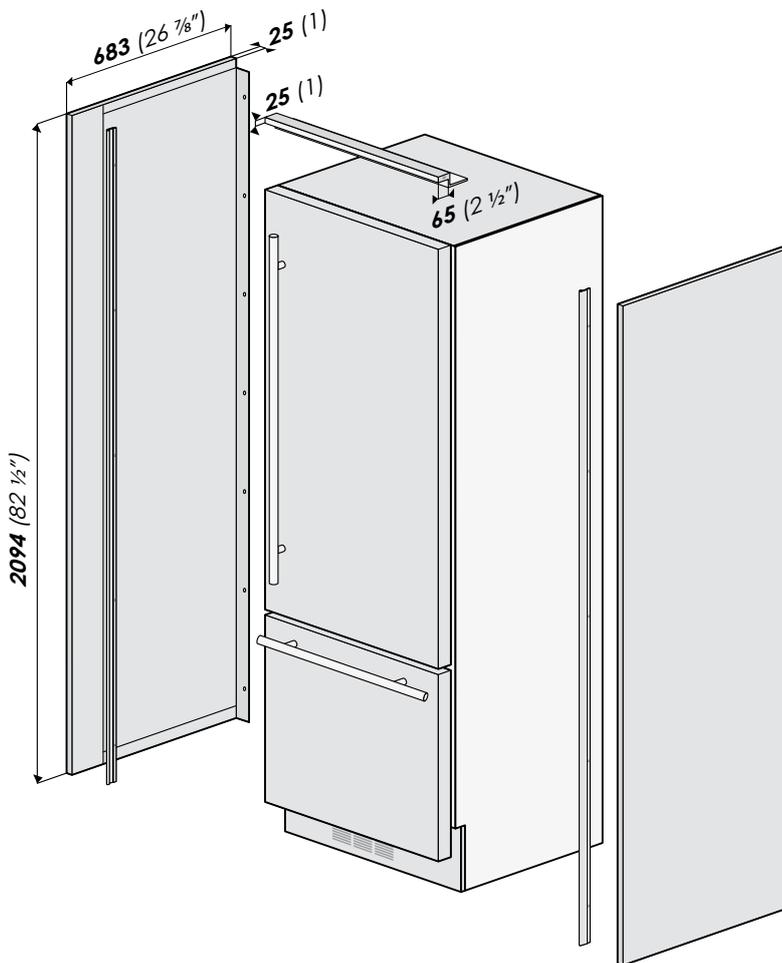

| Combination | Lateral Connecting Framing Kit | Unit          | Joining Kit | Unit            | Lateral Connecting Framing Kit | Total Niche    |
|-------------|--------------------------------|---------------|-------------|-----------------|--------------------------------|----------------|
| 899+599     | 6,5 (1/4")                     | 887 (35")     | 13 (1/2")   | 587 (23 1/8")   | 6,5 (1/4")                     | 1500 (59")     |
| 899+749     | 6,5 (1/4")                     | 887 (35")     | 13 (1/2")   | 737 (29")       | 6,5 (1/4")                     | 1650 (65")     |
| 899+899     | 6,5 (1/4")                     | 887 (35")     | 13 (1/2")   | 887 (35")       | 6,5 (1/4")                     | 1800 (70")     |
| 749+599     | 6,5 (1/4")                     | 737 (29")     | 13 (1/2")   | 587 (23 1/8")   | 6,5 (1/4")                     | 1350 (53 1/8") |
| 749+749     | 6,5 (1/4")                     | 737 (29")     | 13 (1/2")   | 737 (29")       | 6,5 (1/4")                     | 1500 (59")     |
| 599+599     | 6,5 (1/4")                     | 587 (23 1/8") | 13 (1/2")   | 587 (23 1/8")   | 6,5 (1/4")                     | 1200 (47 1/4") |
| 899+599+599 | 6,5 (1/4")                     | 887 (35")     | 13 (1/2")x2 | 587 (23 1/8")x2 | 6,5 (1/4")                     | 2100 (82 5/8") |
| 749+749+899 | 6,5 (1/4")                     | 737 (29")x2   | 13 (1/2")x2 | 887 (35")       | 6,5 (1/4")                     | 2400 (94 1/2") |

Free-standing kit

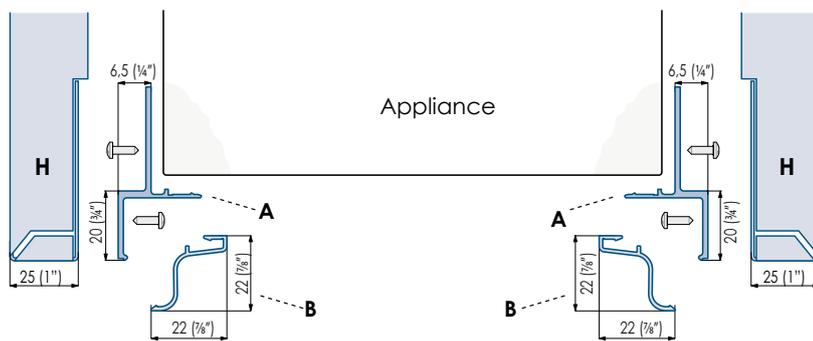

All models of the Integrated series can be installed as built-in or freestanding, using the free-standing kit (cod. ES00000000) to frame the single unit or combination of units with an all-stainless steel portal composed of two side panels and one top.

While the two side panels are available in standard dimension, the top element can be customized to fit combinations of two or more elements.

| Series | Width Stainless-Steel Sides |
|--------|-----------------------------|
| 899    | 950 mm (37 3/8" in)         |
| 749    | 800 mm (31 1/2" in)         |
| 599    | 650 mm (25 5/8" in)         |

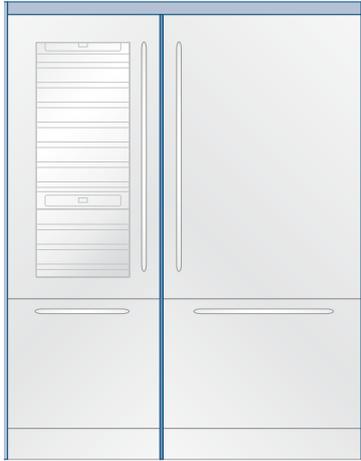

Installation side panel

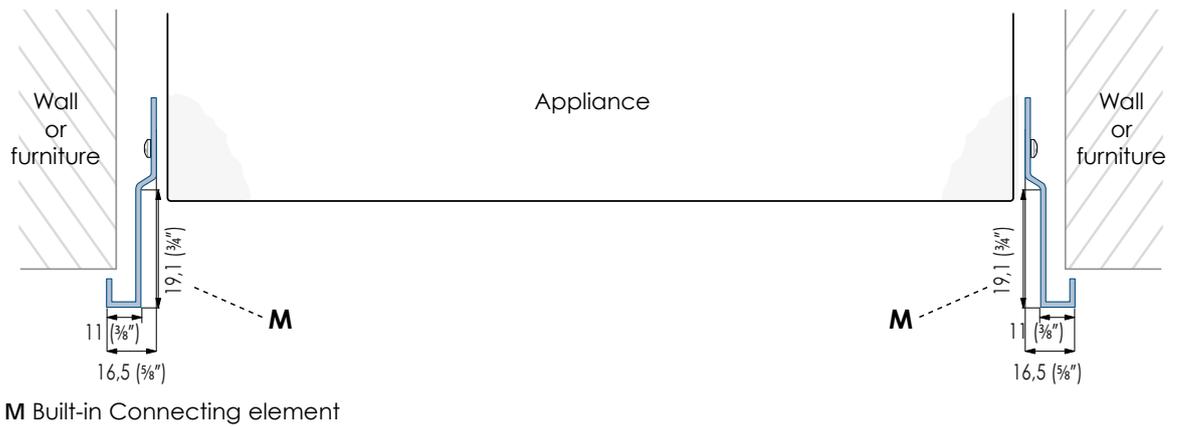

A Connecting element  
B Aluminium frame

H Side panel

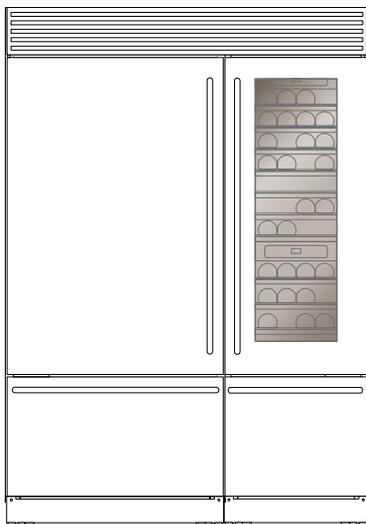

### Kit Built-In for S and K series

The models of the Integrated and Classic series have the opportunity to be placed one or more built using the Built-In side covers and the dashboard in stainless steel (code KI00000000), thereby keeping all in line with the existing structure. The dashboards are available in different widths for individual installations and installations for multiple units side by side.

### Top grill X-Pro series

In the case of combination of two units of the X-Pro you can request the option of the top grill and the front kick plate only up to the maximum of 180 cm. You can ask the viability of larger sizes and costs.

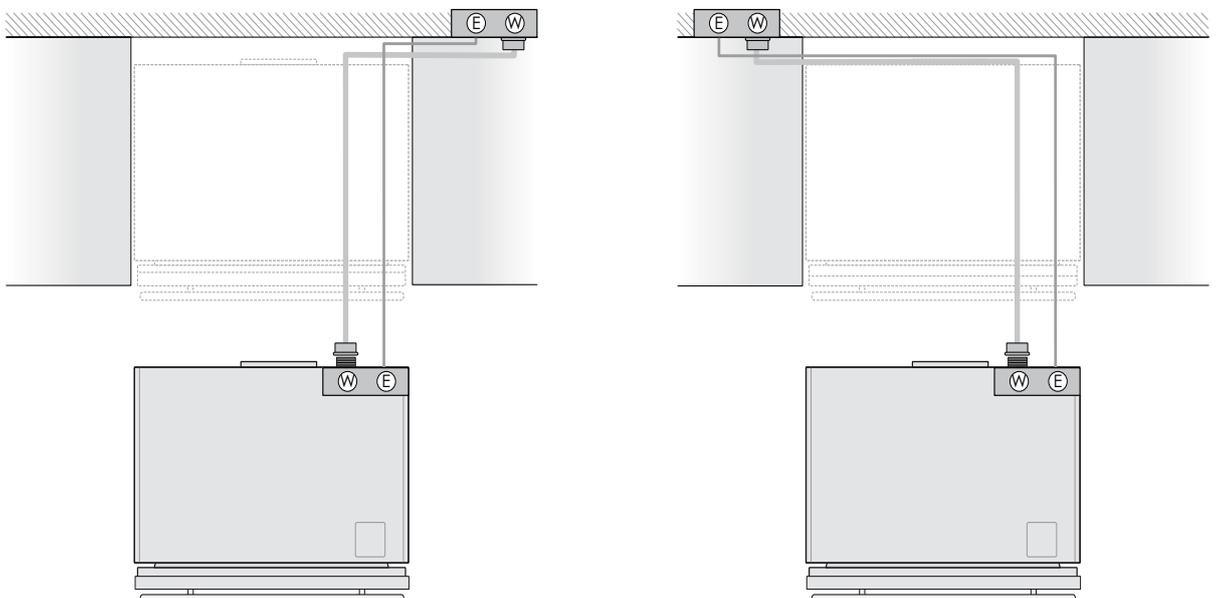

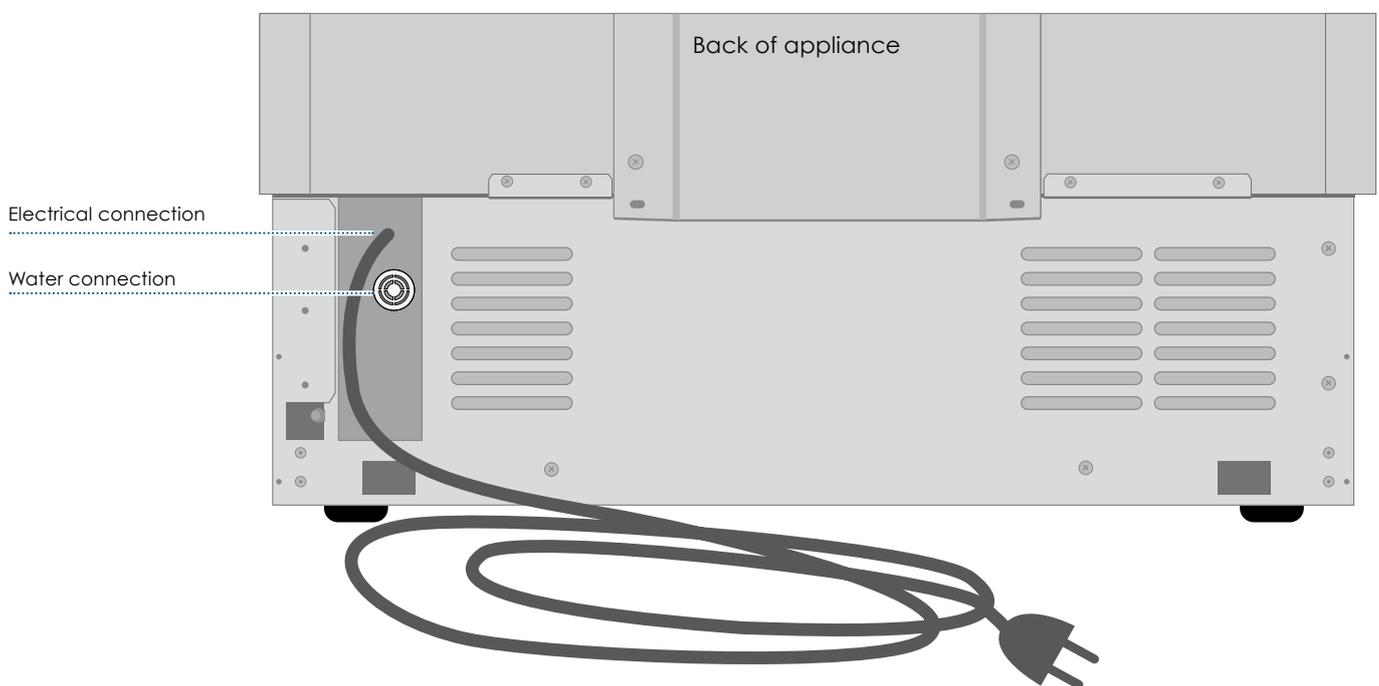

## Electrical and Water connections

Accessories for power supply, earthed plug and cable, are included with the shipment of the appliance; a separate electric circuit with a 220V AC, 50Hz power supply is required.

Models with **Ice Maker or water dispenser** must be connected to the water piping system through the plastic tube supplied with the appliance. The installation of a water closing valve is recommended in an easily accessible area allowing closure

of the refrigerator circuit separately from the general water circuit.

The Ice Maker operates with a water pressure ranging between 2.2 bar and 7.8 bar. Should an **independent or centralised water filtering** system be already installed, Fhiaba's filtering system can be bypassed by removing the filter cartridge.

E = Electrical cord length: 2,0 mt (78 3/4 in)  
 W = Water connection line length: 2,5 mt (98 3/8 in)

## Energy: Alternatives and Home Automation

If energy is supplied through an alternative energy power source (solar, geothermal, etc..) or if home automation systems

are installed, it is necessary to install the Alternative Energy Kit to integrate the unit into the power grid.

## Anti - tipping system

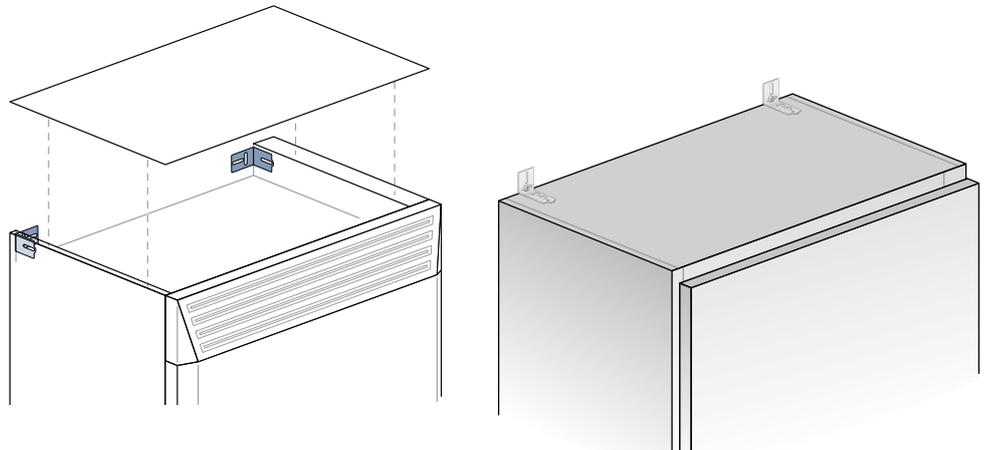

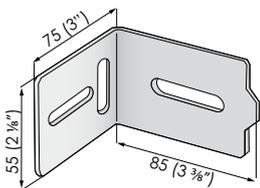

To prevent the appliance from tipping over, is necessary to install the supplied "Standard Anti-tipping Kit" which allows the mounting of the appliance at a maximum distance of 53 mm (2 in) from the rear wall of the installation area.

If the refrigerator is to be installed within units deeper than 67 cm (26.3 in), the "Extra Length Anti-tipping Kit" can be orde-

red (cod. B04000900) separately, allowing the installation in structures up to 80 cm (31,4 in) deep.

In case of deeper structures a wooden plynth must be used to connect the anti-tipping bracket to the rear wall of the installation area.

Standard Anti-Tipping Kit  
B04000200

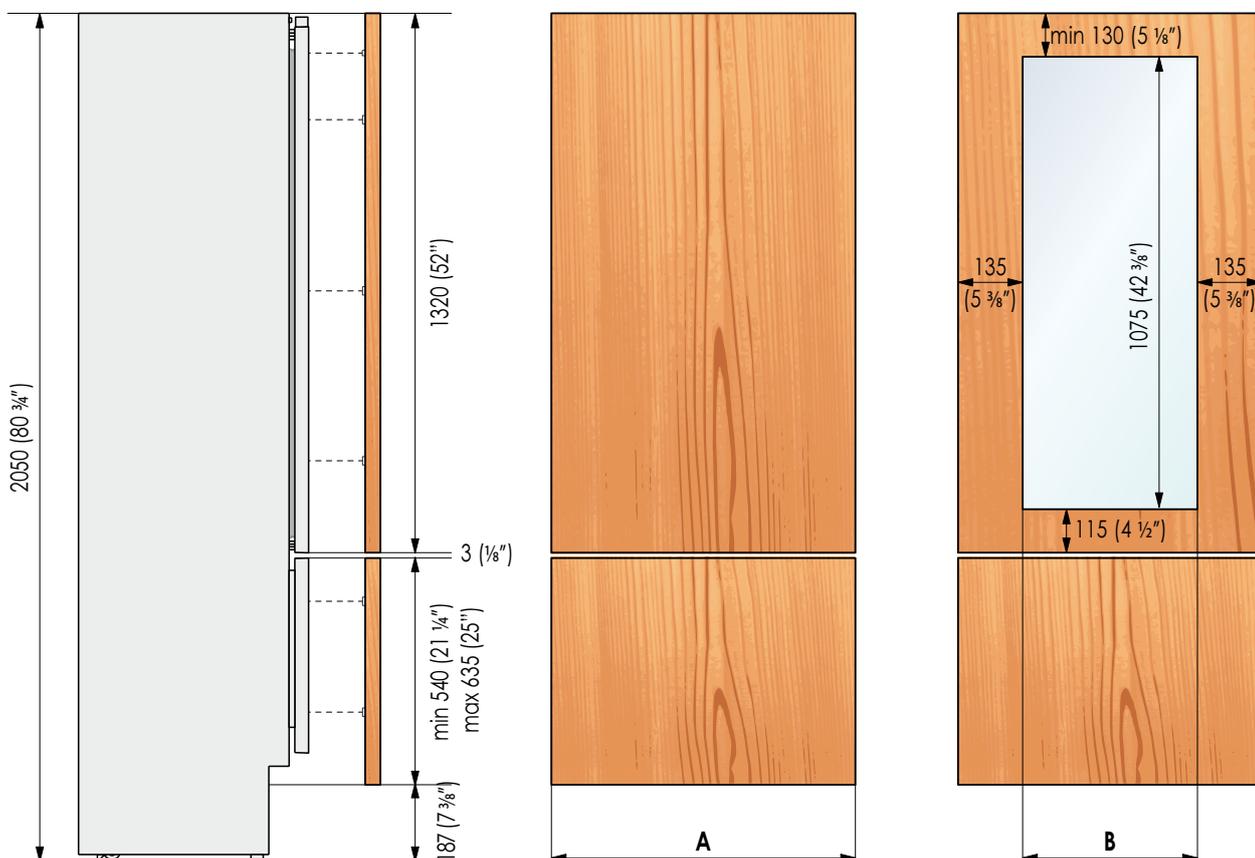

## Height of Panels Calculation models with One Bottom - Drawer (1T/0T)

Panels with width ranging between 18 mm (3/4 in) and 28 mm (1 1/8 in).

Door panels with weight max of 23 kg (51 lb) and drawer panels with weight max of 11kg (25 lb)

| Series | Door/Drawer Width A | Door Cutout Width B |
|--------|---------------------|---------------------|
| 899    | 897 (35 1/4")       | 627 (24 3/4")       |
| 749    | 747 (29 3/8")       | 477 (18 3/4")       |
| 599    | 597 (23 1/2")       | 327 (12 7/8")       |

### Examples of calculation

- Integration in a kitchen column of total height 2160 mm (85 in) and 150 mm (6 in) kickplate.  
(NOTE: In calculating the adjustment foot is considered to 0).

#### Drawer Calculation:

Kickplate 187 - 150 = 37 mm (1 1/2 in) → 540 + 37 = 577 mm (22 3/4 in)

#### Upper Panel Calculation:

2160 - 2050 = 110 mm (4 3/8 in) → 1320 + 110 = 1430 mm (56 1/4 in)

#### Total Height Calculation:

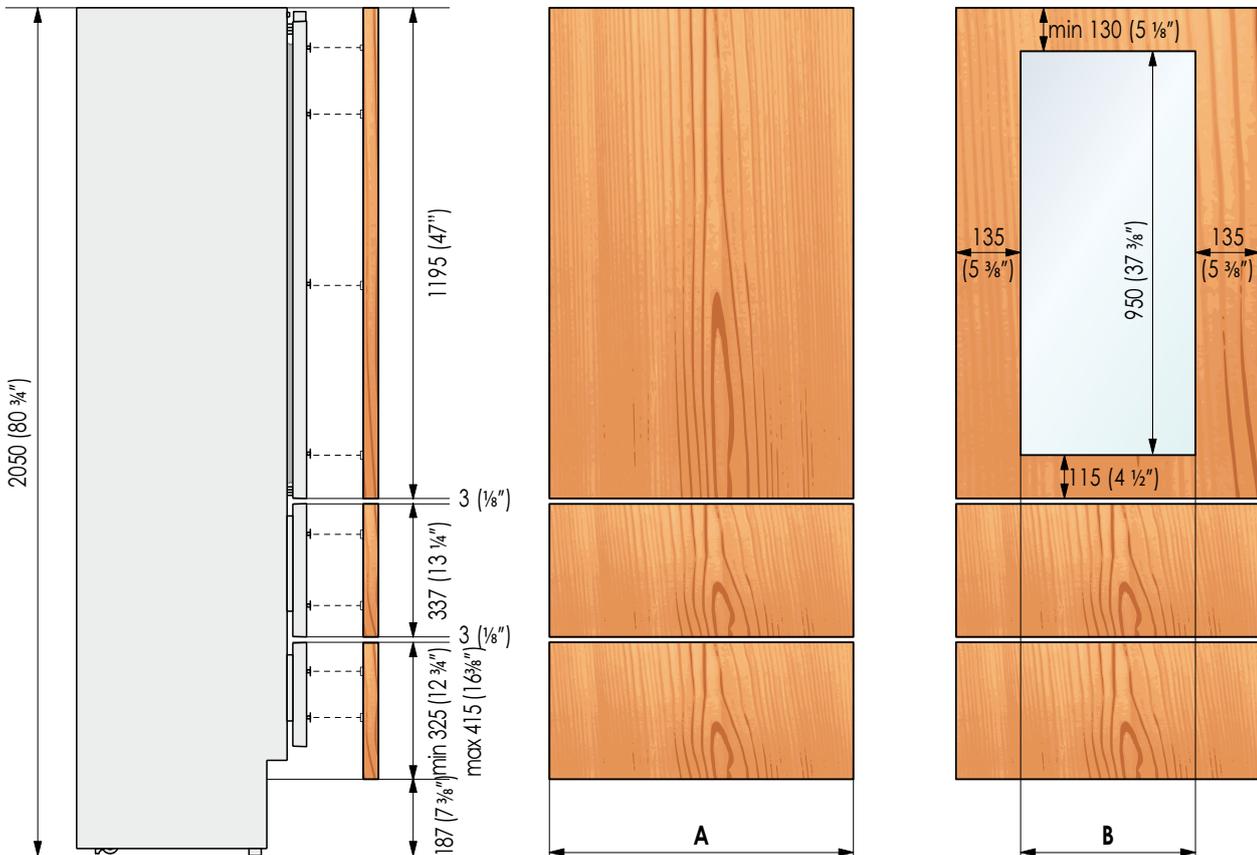

150 + 577 + 3 + 1430 = 2160 mm (85 in)

## Height of Panels Calculation models with Two Bottom - Drawers (0H)

Panels with width ranging between 18 mm (3/4 in) and 28 mm (1 1/8 in).

Door panels with weight max of 23 kg (51 lb) and drawer panels with weight max of 11kg (25 lb)

| Series | Door/Drawer Width A | Door Cutout Width B |
|--------|---------------------|---------------------|
| 899    | 897 (35 1/4")       | 627 (24 3/4")       |
| 749    | 747 (29 3/8")       | 477 (18 3/4")       |
| 599    | 597 (23 1/2")       | 327 (12 7/8")       |

### Examples of calculation

- Integration in a kitchen column of total height 2160 mm (85 in) and 150 mm (6 in) kickplate.  
(NOTE: In calculating the adjustment foot is considered to 0).

#### Inner Drawer Calculation:

Kickplate 187 - 150 = 37 mm (1 1/2 in) → 325 + 37 = 362 mm (14,2 in)

#### Upper Panel Calculation:

2160 - 2050 = 110 mm (4 3/8 in) → 1195 + 110 = 1305 mm (51 3/8 in)

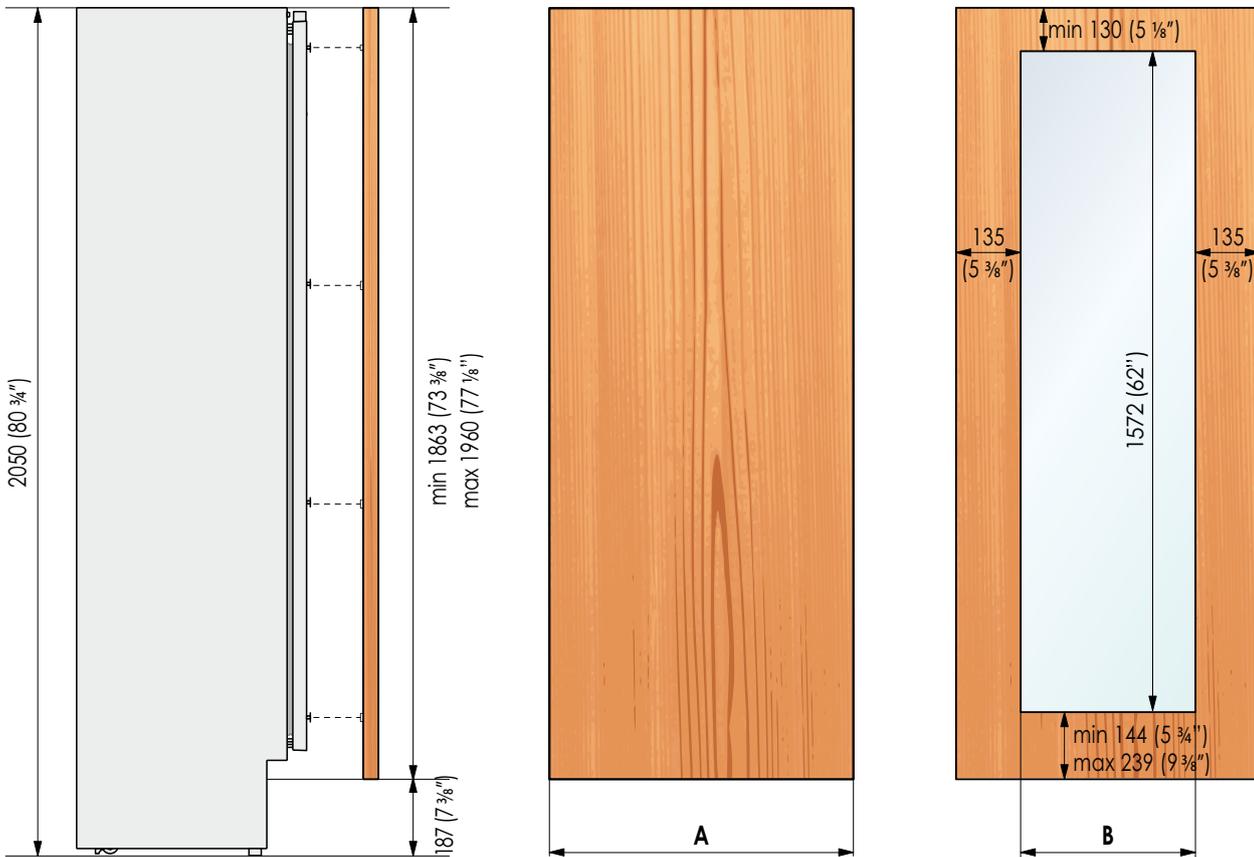

#### Total Height Calculation:

150 + 362 + 3 + 337 + 3 + 1305 = 2160 mm (85 in)

### Height of Panels Calculation Column models

Panels with width ranging between 18 mm (3/4 in) and 28 mm (1 1/8 in).  
 Door panels with weight max of 34 kg (75 lb)

| Series | Door/Drawer Width <b>A</b> | Door Cutout Width <b>B</b> |
|--------|----------------------------|----------------------------|
| 899    | 897 (35 1/4")              | 627 (24 3/4")              |
| 749    | 747 (29 3/8")              | 477 (18 3/4")              |
| 599    | 597 (23 1/2")              | 327 (12 7/8")              |

## Fixing of custom panels

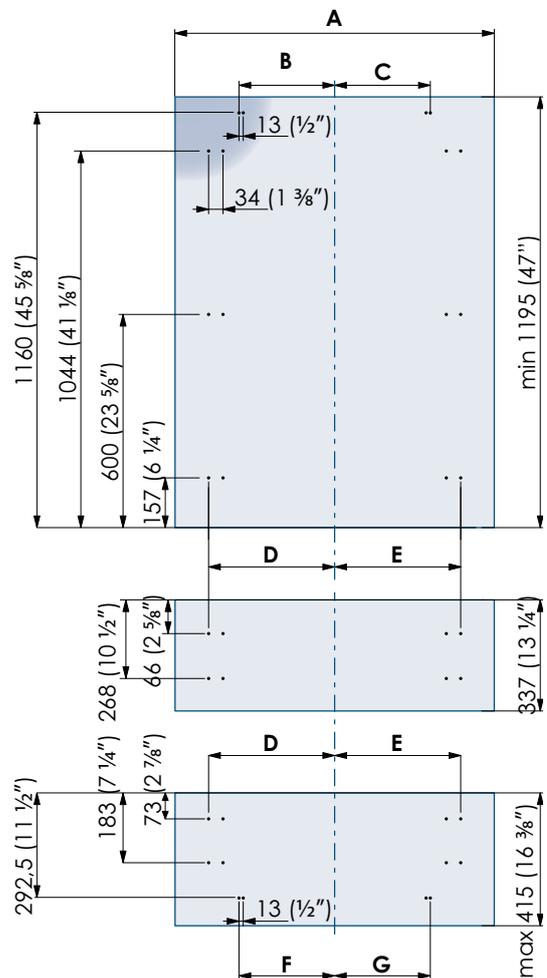

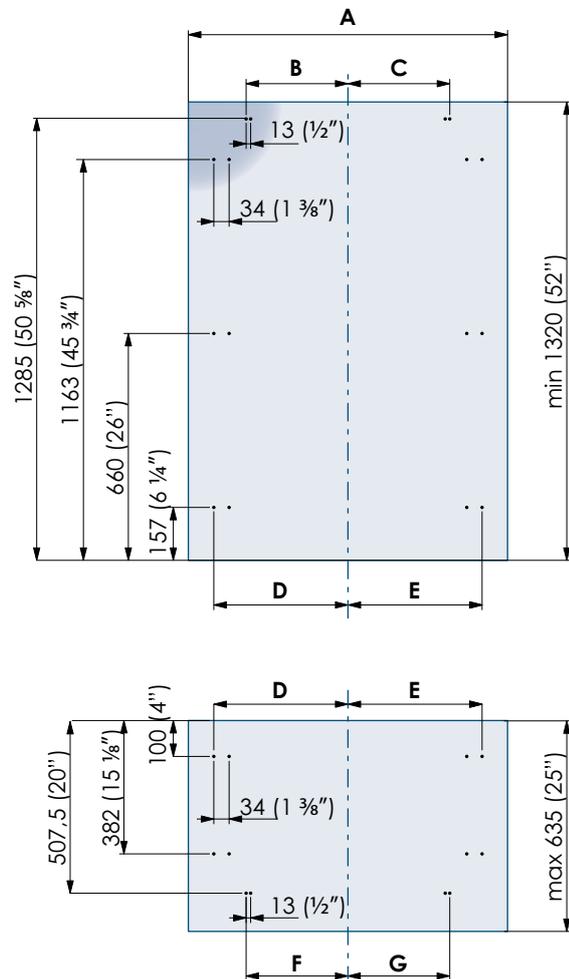

For the application of customised panels to the front of doors and drawers, Fhiaba has designed a patented system, made up of small brackets to be attached on the panels, which will be hooked to the

fixings on the fridge door.

Refer to the following picture and table for the positioning of the brackets on the inside of the panels.

|              | Serie 899     |               | Serie 749     |               | Serie 599       |                 |

### Tubular handles

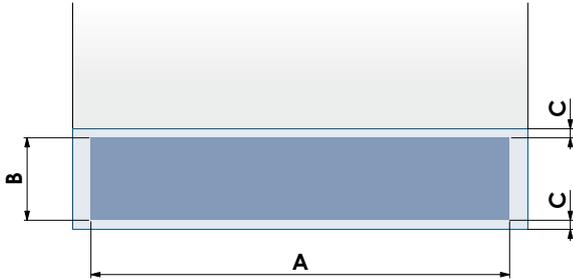

For installation on stainless steel panels or directly on wood panels, there are tubular handles in satin-finish stainless steel, diameter 30 mm (1 1/8 in).

| <b>B</b>   | min 100 (4")  |               |           |
| <b>C</b>   | 10 (3/8")     |               |           |
|  | min 50%       |               |           |

A forced air system assures ventilation through a grille positioned in the lower front part of the unit. If the kitchen design includes a kickplate, the latter has to be punched in order to maintain a satisfactory air flow, as described in the drawing. Holes can be in any shape and size, as long as the total area of the punched part equals 50% of the kickplate area.

In this case, to guarantee a better air flow, it is advisable to remove the front grille included with the unit. The grille is secured to the unit with magnetic plates and can be easily removed even by the end user, to provide for regular cleaning procedures and remove dust.

If the grille is partially covered by the kitchen kickplate, it is advisable to remove the grille in order to provide for a better airflow.

## Weight 899 Series
